

Pacifica Spa Series- XL 70

XL 70

One of the newest members of Aqua Sun Ozone International's product line is the XL 70 with a Universal Power Supply. The Pacifica Pool and Spa Series are Corona Discharge ozone generators for residential spas. In addition to the advantages of Corona Discharge ozone technology, the Pacifica Pool and Spa Series saves money because the Corona Discharge cell uses less energy (no lamp, ballast, or starter) than an ultraviolet generator and cost less to replace.

- Outlet: ¼" OD Barb Fitting
- Ozone Output: 50-100 mg/hr adjustable

Patent Pending

Accessories Available

Venturi Injector
Ozone Check Valve
Tubing

Warranty

Two Years

Ozone is Convenient in Spas

- Ozone does not have to be purchased or stored. Ozone is generated "on site" and is introduced into the water automatically.
- Ozone does not affect the pH balance of water, thus minimizing pH adjustments.
- Ozone helps reduce total dissolved solids in water so that the water does not have to be changed as often.
- Ozone eliminates much of the routine maintenance because it does such an effective job keeping the water clean.
